Physical and Rehabilitation Medicine 2003  
**N. Soroker, H. Ring**

## Part I P&RM in Neurological Disorders

### *Diseases and Trauma of the Brain; Motor Control, Cognition, Language and Behaviour*

Human brain plasticity and recovery from stroke  
**M. Hallett**

The emerging role of transcranial magnetic stimulation in the assessment of stroke  
rehabilitation intervention  
**A. J. Butler, S. L. Wolf**

Assessment measures for stroke rehabilitation  
**N. Chino, M. Liu**

Therapy services and relationship to functional improvement patterns following stroke  
**A. W. Heinemann, R. K. Bode, P. Semik, C. O'Reilly**

An analysis of the rate of functional gain that may be expected during inpatient  
rehabilitation for patients with stroke  
**C. Granger, K. Ottenbacher**

The aftermath of rehabilitation for patients with severe stroke  
**S. Giaquinto**

Differential diagnostic issues in acquired brain injury: the dilemma of mild traumatic  
brain injury  
**N. Zasler**

Perceived needs of persons with traumatic brain injury and relationship to services  
**A. W. Heinemann, K. Sokol, L. Garvin, R. K. Bode**

Factors determining return to work after severe traumatic brain injury  
**Z. Groswasser, O. Keren**

The breakdown and re-establishment of functional behavioral structures and correlated  
brain pathophysiology  
**G. Goldberg**

Theory driven cognitive rehabilitation: the case of spatial neglect  
**N. Soroker**

Event related potentials in language rehabilitation  
**S. Giaquinto**

New directions in the assessment and treatment of aphasia  
**M. Gil**

The thought translation device: a brain-computer interface for the paralyzed  
**N. Birbaumer**

### *Diseases and Trauma of the Spinal Cord*

Trends in the assessment of functional outcomes after spinal cord lesions  
**A. Catz, M. Itzkovich**

Where is the evidence that surgical intervention is beneficial for spinal injuries ?  
**W. El Masri(y)**

Gait rehabilitation in spinal cord injury  
**K. H. Mauritz**

Neurophysiological monitoring for intrathecal baclophen pump management and troubleshooting  
**D. S. Stokic, S. A. Yablon**

### *Neuropathies, Myopathies and Peripheral Nerve Lesions*

Management of peripheral neuropathic pain: an overview  
**J. J. Vatine, S. Faran, Y. Lerman**

## Part II P&RM in Orthopedic and Musculoskeletal Disorders

### *Limb Trauma, Surgery and Amputation*

Prosthetic restoration and rehabilitation: from surgery to community reintegration  
**A. Esquenazi**

Rehabilitation for people who have had joint replacements  
**F. Khan, P. Disler, J. Pallant**

Compartment syndromes of the lower leg  
**A. Steyaert, G. Vanderstraeten,**

## *Rheumatoid Arthritis; Osteoarthritis; Osteoporosis*

Assessment of rheumatoid arthritis, osteoarthritis and ankylosing spondylitis  
**G. Stucki**

Work and rheumatic diseases  
**M. A. Chamberlain**

Clinical practice guidelines for rehabilitation management of people with osteoporosis  
**M. Grabis**

The bone and joint decade  
**N. Walsh**

## *Back and Other Musculoskeletal Pain*

Evidence based medicine in treating low back pain  
**T. Parlevliet, G. Vanderstraeten**

An analysis of the rate per day of pain improvement that may be expected and factors affecting improvement in outpatients with low back pain  
**C. Granger, J. Lackner, M. Kulas, C. Russell**

Evaluating rehabilitation programs for fibromyalgia and other chronic musculoskeletal pain  
**P. Disler, J. Pallant, J. Exton, F. Thomas, L. Boyd, J. Stone, P. Lowthian, D. Lewis**

## Part III P&RM in Other Specific Conditions

### *Geriatric Population*

Rehabilitation goal setting in the aged  
**Y. N. Berner**

Novel interventions to reduce falls in older adults: Tai Chi and beyond  
**S. L. Wolf, M. O'Grady**

### *Pediatric Population*

Traumatic brain injury in childhood  
**A. Ward**

Contextualized hypothesis-testing assessment of children and adolescents with cognitive impairment after brain injury  
**M. Ylvisaker**

Neuropsychological rehabilitation of communication, cognitive, and behavioral disturbances following TBI in children and adolescents

**M. Ylvisaker**

Comprehensive management of cerebral palsy

**C. Il Park**

Transitional services

**M. A. Chamberlain**

## Part IV Topics of General Interest in P&RM

### *Pain*

Current and future treatment strategies for chronic pain

**B. H. Sjölund**

Multidisciplinary pain programs: evolution and reinvention

**M. Grabois**

Pain management and the musculoskeletal system: gender differences

**M. A. Young**

### *Spasticity*

Management of spasticity: a scientific basis for outcome measures

**G. R. Johnson**

### *Sexual Disability*

Sexuality and disability

**T. Monga**

### *Wound Care*

Prevention and treatment of chronic wounds

**I. Siev-Ner**

### *Premature Aging*

Premature aging: a danger to life expectancy and quality of life of the disabled

**A. Ohry**

### *Electrodiagnosis*

New concept in nerve conduction studies

**J. Kimura**

Surface EMG in rehabilitation: a mature tool to assess neuromuscular function (ing)  
**H. Hermens**

*Biomechanics; Kinesiology; Dynamic Posturography;  
Motion and Gait Analysis*

Biomechanical factors in the complexity of stress fracture formation  
**E. Isakov, J. Mizrahi**

Impairment-based approach to managing balance and mobility disorders: applications  
for computerized dynamic posturography  
**L. M. Nashner**

Recent advances in ambulatory monitoring of activities of the hand and arm  
**H. J. Stam, F. C. Schasfoort, J. B. J. Bussmann**

Gait analysis: when and why it should be used  
**E. Isakov**

*Orthoses*

Orthoses for different kinds of disabilities  
**C. Marincek, H. Burger**

*Advanced Technologies in Rehabilitation*

Rehabilitation engineering: research perspectives from the US Veterans Health  
Administration  
**M. Aisen**

*Functional Electrical Stimulation*

Advances in functional electrical stimulation: 2003 and a look to the future  
**H. Weingarden**

Training dosage and timing of electrical stimulation may be the key for maximizing the  
effects of NMES in neurorehabilitation  
**G. Alon**

*Organization and Management of Rehabilitation Services;  
Quality of Care*

Rehabilitation in general hospitals and in rehabilitation centers  
**J. Melvin**

Community based rehabilitation – the concept and its implementation  
**R. Eldar**

Quality of care improvement mechanisms in rehabilitation medicine  
**R. Eldar**

*Scope of the Specialty; Educational Needs; Ethical Considerations*

International rehabilitation education: a comparative analysis and discussion  
**M. Young, P. Disler, G. Akyuz, H. Nunez Bernadet, C. Dziri, A. Eyadeh, M. Imamura, S. I. Izumi, Z. Omar, B. J. O'Young, H. Stam, J. Vacek**

Publishing in peer-reviewed journals: time to review the peer review  
**H. Ring, M. Aisen, P. Di Benedetto, M. Grabois, G. Grimby, D. Johnson, N. Walsh, N. Zasler**

Ethical considerations in contemporary rehabilitation medicine: theoretical background, models and practice  
**A. Ohry**

Complementary medicine in rehabilitation  
**I. Siev-Ner, D. Gamus**

*Evidence-Based Rehabilitation; Outcome Measurement; Assessment of Disability, Participation and Quality of Life*

Outcome research in rehabilitation: variable construction, trial design and statistical inference  
**L. Tesio**

Assessment of handicap / participation  
**G. Grimby**

Health-related quality of life assessment  
**F. Franchignoni, C. Bertolini**

Value and application of the WHO-ICF in rehabilitation medicine  
**G. Stucki, A. Cieza, T. Ewert**

The case for public disclosure of rehabilitation outcomes  
**G. DeJong**
